

CAPT PRACTICE TEST and CAPT VIDEO ARCADE INFORMATION PAGE

The CAPT Practice Test and the CAPT Video arcade game are meant to be a fun way to prepare for the CAPT Science Exam. You may use them any way you want but they were intended to be used as a practice test with 45 questions numbered as the CAPT strands 1-45. Inquiry questions are not included but will appear as a separate document. After completion of the practice test a student can check their answers and indicated on the excel spread sheet using the colored “cells”

Green for a correct answer and confidence in the topic

Yellow for correct or incorrect answer but little confidence in the topic

Red for incorrect answer and no confidence in the topic

The Color coding is then meant to direct their viewing of videos and playing interactive games/activities on the topic that are linked in the spreadsheet.

I hope you enjoy using it in your studying and teaching. Feel free to let me know of good links that work well with this project.

Sincerely,

Jeffrey F. Shannon, Ph.D.
Science Department Head
Westhill High School
